DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I, claims 1-2 in the reply filed on 7/28/05 is acknowledged. The traversal is on the ground(s) that all claims are directed to a 'vasodilator' and therefore should be searched co-extensively. This is not found persuasive because as pointed out in the original restriction requirement, although the products are vasodilators, the products are none-the-less patentably distinct products in that they are structurally and functionally distinct which would provide for different effects when administered to a patient.

The requirement is still deemed proper and is therefore made FINAL.

Applicant's election of the species of 'laver' in the reply filed on 9/22/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-2 directed toward 'laver', the elected species, were examined on their merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Suetsuna et al. (JP 20000157226A) or Suetsuna et al. (JP 11080193 A).

Suetsuna et al. (JP 20000157226A) as well as Suetsuna et al. (JP 11080193 A) disclosed a hypotensive agent obtained by hydrolyzing laver peptides with pepsin (see English abstract).

Thus, Suetsuna et al. anticipate the claimed invention.

No Claims are allowed.
